EDUCATION

St. Christopher's School, Bahrain — **Expected June 2027**

A Levels - Mathematics (Pearson Edexcel) | Physics (Oxford AQA) | Computer Science (Oxford AQA)

International General Certificate of Secondary Education - Mathematics: 8 | Computer Science: 8 | Double Science: 7–7 | English Literature: 7 | English Language: 6 | Business: 6 | Economics: 6 | Arabic: 6 — **June 2025**

INTERNSHIP / WORK EXPERIENCE

Nurve Partners — **June 2026 – Aug 2026**

Consulting Intern

- Conducted market research and competitor benchmarking to support consulting engagements across multiple industries.
- Organized and analyzed quantitative market data to identify trends and generate strategic insights.
- Prepared presentation materials summarizing research findings for client-facing discussions.
- Led an independent benchmarking workstream, synthesizing competitive intelligence and presenting recommendations to the consulting team.

STC Pay — **June 2024 – July 2024**

Intern

- Explored stc pay's digital financial ecosystem, including prepaid card products, remittance services, and mobile payment solutions.
- Examined how partnerships with global payment networks such as Mastercard enable secure card issuance and digital payment infrastructure.
- Developed an understanding of Know Your Customer (KYC) requirements, regulatory compliance, and the role of financial regulations within Bahrain's banking sector.
- Analyzed the importance of cross-border remittance services in Bahrain's expatriate-driven economy and their impact on financial inclusion.

RESEARCH PAPERS

- Authored and published five independent research papers exploring artificial intelligence, machine learning, reinforcement learning, computer vision, and quantitative finance. — **Sep 2025 – Present**
- Investigated topics including Transformer-based financial forecasting, machine learning for stock market prediction, reinforcement learning in strategic decision-making, diffusion-generated image detection, and exploration–exploitation tradeoffs in AI systems.
- Synthesized peer-reviewed literature and publicly available datasets to evaluate emerging AI methodologies.

PROJECTS

Passion Project — **Feb 2026 – Present**

- Developing an AI-enabled marketplace intended to connect small-scale Lebanese olive oil producers directly with global consumers.
- Designing features that promote product authenticity through multimedia verification, improving transparency and consumer trust.
- Creating a scalable platform architecture capable of being adapted for multiple agricultural industries beyond olive oil.

Project Euler — **Feb 2026 – Present**

- Solved 50 Project Euler problems requiring mathematical reasoning, algorithm design, and computational problem-solving.
- Strengthened proficiency in Python, optimization techniques, and analytical thinking through increasingly complex coding challenges.
- Developed a deeper understanding of efficient algorithms by independently exploring multiple solution strategies.

Handwritten Digit Detection — **Feb 2026 – Mar 2026**

- Co-developed a handwritten digit recognition model using PyTorch capable of classifying digits drawn within a 28×28 pixel grid.
- Designed, trained, and optimized the neural network, experimenting with model architecture and hyperparameters to improve predictive performance.
- Achieved over 95% classification accuracy.

LEADERSHIP AND ACTIVITIES

Muay Thai — **Jan 2014 – Jun 2023**

- Trained in Muay Thai for over eight years.
- Balanced intensive athletic training with academic responsibilities.

Skiing — **Jan 2014 – Jun 2023**

- Progressed to advanced off-piste skiing across Switzerland, France, Italy, Georgia, and Lebanon.
- Developed technical precision, adaptability, and risk assessment while navigating challenging alpine terrain.

VOLUNTEER WORK

- Volunteer with the Family Rights Forum to distribute essential food and household supplies to families affected by the conflict in Lebanon. — **June 2023 - Present**
- Contribute to humanitarian relief efforts supporting more than 1,000 families through community-based aid initiatives.

SKILLS

Languages: English (native), Arabic (Intermediate)

Technical Skills: Programming: Python, Java | Machine Learning & Data Science: PyTorch, NumPy, Matplotlib
